

# BALERS

Versatile Down Stroke Recycling Baler

## Features

- Capable of baling OCC, paper, cloth and non-ferrous metals
- Automatic cycle operation and automatic full bale shut-off
- Pull down safety gate with chains and sprockets
- 48" loading height
- Warranty for one year on all parts and labour; 2 years on all parts replacement
- Heavy duty structural frame

## Versatile Down Stroke Recycling Baler

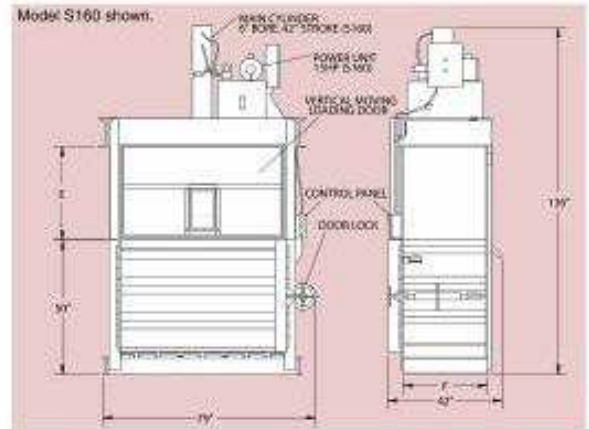

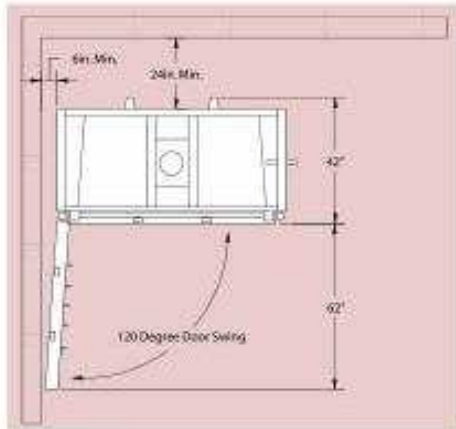

### Standard Features

The Samuel Series Balers are designed for trouble free and efficient baling of any compressible recycling material. With their ability to compress paper, cardboard, cloth, plastics, and non ferrous metals, these versatile balers are ideal for customers in retail, industrial and commercial applications. The simple but rugged design of the Samuel Series, ensures years of low maintenance operation in even the harshest environments. Simple controls and instructions allow safe operation of the machine by workers of all skill levels.

The Samuel Series Baler can apply up to 6 single loop wires per bale depending on the model that you choose for your operation. Operators feed the wire around the compressed bundle using the built in wire feed channels. After tying off the wire, the operator activates gravity driven ejection system to release the bale.

### Specifications

	S160	S160LP	S170
Bale Depth	30	30	30
Bale Height	48	48	48
Bale Width	60	60	72
Bale Ties	5	5	5
Bale Weights Up To	1000	800	1000
Cylinder Bore (Inches)	6	6	6
Cylinder Rod (Inches)	3.5	3.5	3.5
Cylinder Stroke (Inches)	48	42	48
Pump (GPM)	15	15	15
Motor (HP)	15	15	15
Standard Voltage	208-575/3Ph	208-575/3Ph	208-575/3Ph
System Pressure (PSI)	2000	2000	2000
Compact Force (LBS)	56,548	56,548	56,548
Average Cycle Time (Seconds)	37	37	37
Total Baler Weight (LBS)	4800	4300	5800
Dimensions (WxDxH inches)	79x42x144	79x42x144	91x42x144
Door Clearance (Inches)	62	62	70
